# BERGO SPORT FLOORS

When evaluating a flooring for your premises or for a specific event, you have to consider factors such as: suitable surface for the specific sport, maintenance, installation, removal, durability, environmentally impact and appearance. BERGO SPORT FLOORS offer a high performance level considering all these factors. Fitting the floor yourself could not be easier, that's another big advantage.

## Two designs

BERGO is an interlocking flooring system available in two designs, several colours and ideal for most sports and activities. You may choose from the following two designs MULTISPORT or TENNIS.

## Construction

The unique construction will give correct resilience, bounce and friction. The perforated pattern and underneath design allows excellent drainage capability, which will make the court dry quickly after rain. No puddles. The floor can stay outside in both summer and winter in any climate conditions. BERGO is according to evaluations made by Chalmers Technical University of Sweden, lenient with the players back and joints.

## Easy to install

BERGO can be installed on concrete, asphalt or almost any other hard and flat surface. Tapping a rubber mallet or similar over the protruding rings easily interlocks the tiles together. No special tools, glue or screws are needed. Use a jig- or circularsaw to cut the tiles for a perfect fit.

## Accessories

The interlocking flooring system offers several practical accessories such as: Disassembly-tools, Edge-/Corner strips and Expansion strips/Cross-pieces in matching colours.

## Lines

Lines can either be created by using tiles, expansion strips or by normal painting procedure.

## Disassembly-tools

The ingenious design allows for the floor to be moved quickly. The floor can easily be taken apart by using a disassembly-tool. In case one tile is damaged on the court you can change the individual tile by using a replacement-tool.

## Minimal maintenance

BERGO requires virtually no maintenance. Normal floor care such as occasional wet cleaning, vacuuming and/or power hosing is usually all that is needed. The flooring system is without doubt a cost saving alternative to high maintenance floors/coatings.

## Advantages

- Withstand all climates and environments
- For indoor and outdoor use
- Easy to install and move
- Requires minimal maintenance
- Ergonomic - easy on your back and joints
- Hot/cold reducing
- Correct bounce over the complete court
- Very durable
- Excellent drainage capability
- Ventilates the floor underneath
- All-weather court – dries quickly after rain
- Sound absorbing characteristics
- Ideal on worn asphalt or cracked concrete.

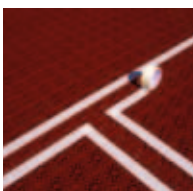

## Environment

Eco-friendly production, with no harmful emissions. Production with environmentally friendly 100% recyclable materials and in our ECO-range with already recycled materials. We reduce volume of waste!

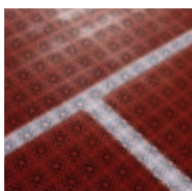

## Economic

Easy to install and requires no fasteners such as nails, screws, glues, etc. The floor is longlasting, easy to move and needs minimal maintenance. Perfect for renovating old courts.

# BERGO MULTISPORT

MULTISPORT can be installed for most usage areas.

The level of friction provides stop and go characteristics which are perfect for: Inline hockey, Floorball, Basketball, Soccer, Badminton, Handball, Volleyball, Netball, Aerobics etc.

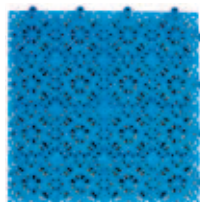

BERGO is also an ideal solution for on/off arrangements, such as special events, shows and exhibitions where you need to install and remove the flooring quickly. BERGO is widely used in various hockey tournaments in Sweden and recommended by several sport federations.

BERGO is according to players in The Swiss Inline Hockey League (SIHL) superior in the following important criterion:

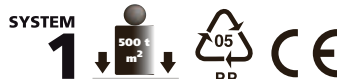

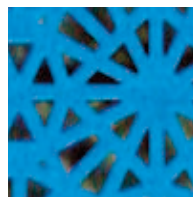

- Skate conduct
- Level of noise
- Grip/Braking manoeuvre
- Puck conduct

## Technical information

Material:	Environmentally friendly recyclable UV-stabilized PP composite.
Size:	303,3 x 303,3 mm.
Packaging:	<ul style="list-style-type: none"> <li>• 5 m<sup>2</sup> / box = 55 tiles</li> <li>• Pre-assembled sections, 4 x 3 tiles</li> </ul>
Thickness:	14,1 mm
Standard colours:	Several standard colours. Optional colours upon request.
Accessories:	<ul style="list-style-type: none"> <li>• Edge strips, 300 x 55 mm.</li> <li>• Corner strips, 55 x 55 mm.</li> <li>• Expansion strips, 150 x 75 mm</li> <li>• Disassembly-Tool</li> <li>• Replacement-Tool</li> </ul>

Smooth surface

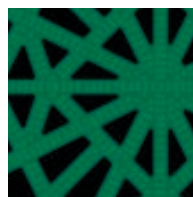

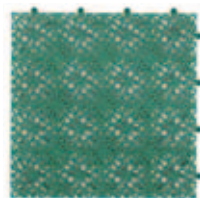

# BERGO TENNIS

BERGO TENNIS is a well established surface, approved and classified by ITF and the Swedish Tennis Association.

The excellent drainage capacity/special design will give a high usage ratio and the surface will bring good economy to the investor.

The minimal maintenance required has been appreciated by communities, embassies, hotels, large companies and leisure establishments all over the world.

The floor has been classified "Medium-Fast" and the unique construction gives correct resilience, bounce and friction.

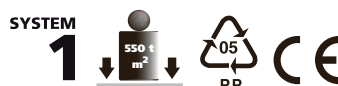

Surface with knobs

Bergo Tennis gives correct bounce over the complete court 11° angle of incidence gives a 13° angle of bounce.

## ECO TENNIS

Bergo Flooring is taking another step in its commitment to the environment.

As part of helping to reduce mountains of waste, BERGO FLOORING takes the success of the latest product series, PURE - the ECO floor, further. At the FSB fair in 2013, we are launching our tennis flooring ECO-Tennis made of 100% recycled materials. At the same time we add the ECO range with two new attractive colors; Soft Green and Blue Sea.

After years of development with leading recycling companies, we have succeeded in producing a material which holds the same high quality as our other multifunctional composite flooring, and which also can be produced in many attractive bright colors, that makes us unique.

Our flooring is also 100% recyclable in the next step, and in the next, and can finally be used in district heating plants for warming up our homes, without environmentally harmful emissions.
